XR Event Planning

Interactive Prototype 2 Testing Results

1. Testing Summary

Five participants tested the prototype using a VR headset. They completed three tasks: arranging the venue, removing furniture, and customising lighting and theme.

All five completed the tested interactions independently without moderator assistance. Lighting and theme were recorded separately, although they were part of the same task.

P1–P3 were audio-recorded. P4–P5 were documented through testing notes.

2. Participant Results Table

Participant	Furniture Arrangement	Remove	Lighting	Theme	Guide Use	Recording
P1	Pass	Pass	Pass	Pass	Used and considered helpful	Yes
P2	Pass	Pass	Pass	Pass	Used and considered helpful	Yes
P3	Pass	Pass	Pass	Pass	Used and considered helpful	Yes
P4	Pass	Pass	Pass	Pass	Used and considered helpful	No
P5	Pass	Pass	Pass	Pass	Used and considered helpful	No

Pass means independent completion. Use of the built-in Guide does not count as moderator assistance.

Independent completion totals:

- Furniture arrangement: **5/5**

- Removal: **5/5**
- Lighting adjustment: **5/5**
- Theme change: **5/5**

3. Key Recorded Observations

- P1–P5 considered the Guide helpful.
- P1–P5 completed all tasks independently.
- P2 and P3 specifically identified the furniture indicator as helpful.
- P1–P3 described the Remove area as clear.
- P1–P3 said the Remove, Lighting, and Theme controls were easy to find or move between.
- P2 described the venue as empty and suggested windows or other details.
- P3 also described the venue as empty and said they were initially unsure where to start.
- P1 did not suggest an improvement at this stage.

4. Appendix / Raw Data

Appendix A: P1 Transcript

Facilitator: Was there any point where you were unsure what to do next?

Participant 1: No, I think everything was pretty straightforward. I think it was also easy to follow.

Facilitator: Did anything help you understand how to grab or move the furniture?

Participant 1: Yeah. Before doing anything, there were clear options for adding things like a chair or a table, then moving them or placing them in the Remove area. Things like that helped make it easier to understand.

Facilitator: How clear was the Remove area and its location?

Participant 1: It was very clear because it was a really big section in the area. You just needed to bring the furniture over and place it in the Remove area.

Facilitator: Were the Remove, Lighting, and Theme controls easy to find and move between?

Participant 1: Yeah. It was simple, and using the controller for those areas was pretty easy.

Facilitator: If you used the Guide, was it helpful?

Participant 1: Yeah, I think it was.

Facilitator: What is one thing you would improve?

Participant 1: I don’t think there is anything I would improve at this point. I think it is all pretty straightforward.

Appendix B: P2 Transcript

Facilitator: Was there any point where you were unsure what to do next?

Participant 2: No, everything was clear.

Facilitator: Did anything help you understand how to grab or move the furniture?

Participant 2: Yeah, I think the grabbing indicator helped a lot.

Facilitator: How clear was the Remove area and its location?

Participant 2: It was clear. I could easily see where it was.

Facilitator: Were the Remove, Lighting, and Theme controls easy to find and move between?

Participant 2: Yeah.

Facilitator: If you used the Guide, was it helpful?

Participant 2: Yeah.

Facilitator: What is one thing you would improve?

Participant 2: I think the venue is a bit empty. Maybe you could add something, like some windows or other details.

Appendix C: P3 Transcript

Facilitator: Was there any point where you were unsure what to do next?

Participant 3: No, I think everything was quite clear.

Facilitator: Did anything help you understand how to grab or move the furniture?

Participant 3: Yes, because there is an indicator on each piece of furniture.

Facilitator: How clear was the Remove area and its location?

Participant 3: I think it was quite clear.

Facilitator: Were the Remove, Lighting, and Theme controls easy to find and move between?

Participant 3: Yes, quite easy.

Facilitator: If you used the Guide, was it helpful?

Participant 3: I think so, yeah.

Facilitator: What is one thing you would improve?

Participant 3: Maybe when I first entered the venue, it felt quite empty, so I was not really sure where to start. Maybe you could add some furniture or something that indicates where to begin.

Appendix D: P4 Testing Note

P4 was not audio-recorded.

P4 completed all three testing tasks independently and demonstrated understanding of the interaction workflow. Furniture arrangement, removal, lighting adjustment, and theme change were completed without moderator assistance.

P4 used the Simulator Controls Guide and considered it helpful.

Appendix E: P5 Testing Note

P5 was not audio-recorded.

P5 completed all three testing tasks independently and demonstrated understanding of the interaction workflow. Furniture arrangement, removal, lighting adjustment, and theme change were completed without moderator assistance.

P5 used the Simulator Controls Guide and considered it helpful.
